1.1 Corpus metrics

Linguistic metric	Measured value	Interpretation & reference
Total word count (full text incl. appendix)	121,795 words (687,856 characters)	Full text including the appendix. (~487.2 norm pages à 250 words / ~458.6 norm pages à 1,500 characters).
Main text word count (prose only)	121,608 words (686,949 characters)	Prose only. (61 chapters).
Total sentences (main text)	5,852 sentences	Total sentences of the main text.
Average sentence length (ASL)	20.15 words / sentence	Average sentence length of the main text.
Median sentence length	16 words	Median sentence length.
Sentence-length standard deviation	15.90 words	Spread of sentence lengths.
Lexical diversity (TTR)	0.0538 (V = 6,340 / N = 117,916)	Lexical diversity (type-token ratio).
Guiraud index R (V/√N)	18.46	V/√N; still sensitive to text length and topic.
Yule's Characteristic K	81.11	Vocabulary stability across text length.
MTLD (Textual Lexical Diversity)	102.3	Length-robust lexical diversity; short samples remain unstable.
MATTR (Moving-Average TTR)	0.827	Window-stable type-token ratio (Covington & McFall 2010).
Maas a^2	0.0494	Vocabulary concentration (Maas 1972; lower = richer).
Flesch Reading Ease	64.7	Language-calibrated readability formula of the active profile.
LIX (readability index)	39.7	Readability index (LIX).
Dialogue share (quoted speech)	53,301 words (45.20%)	Share of quoted speech in the prose.
Prose paragraphs	2072 (56.8 words/paragraph)	Paragraph economy of the main text.

1.2 Sentence-length architecture & rhythm

The empirical sentence distribution of the main text:

Sentence-length category	Criterion	Sentences	Share	Interpretation limit
Short sentences (staccato)	≤ 6 words	911	15.6%	Short sentences; pace requires contextual review.
Medium sentences	7–15 words	1,988	34.0%	Sentence-length category, not a narrative judgement.
Long sentences	16–25 words	1,345	23.0%	Sentence-length category, not a narrative judgement.
Very long sentences	> 25 words	1,608	27.5%	Length does not establish syntactic nesting.

1.3 Punctuation as a stylistic seismograph

Punctuation mark	Frequency	Density (per 1,000 words)	Interpretation limit
Periods (.)	5,961	49.0	Basic sentence rhythm.
Commas (,)	9,178	75.5	Enumerations and appositions.
Dashes (–/—)	0	0.0	Afterthought, self-correction, insertion.
Colons (:)	194	1.6	Announcing lists, quotes, insights.
Semicolons (;)	1,614	13.3	Rare; avoids a lecturing tone.
Question marks (?)	473	3.9	Self-questioning and dialogue.
Exclamation marks (!)	422	3.5	Used sparingly.
Ellipses (…/...)	0	0.0	Breaking off a thought.
